NOTE: by using the “**CASINO SETTINGS**”->“**ADMINISTRATOR PANEL PERMISSIONS FEATURE**”, you can restrict or give access to a specific page from the administrator panel, so that the agents/operators can have or not access to that page.

I.CASINO SETTINGS

The screenshot displays the 'Administrator Panel' interface. At the top, there's a navigation bar with 'Welcome, admin (Master -)' and a language selector (UK flag). Below this is a dashboard with various icons: 'How to use this page?', 'Casino Settings', 'Create User', 'Transfer funds', 'Check Users', 'Check earnings', 'Check deposits', and 'Log out'. A summary section shows '13 deposits', '7 withdrawals', and '689 users' for 'Today'. The main content area is titled 'Permissions' and contains a table of 'Administrator Panel Permissions'. The table has columns for ID, Page name, File name, Agent, and Operator. The 'CASINO SETTINGS' sidebar is visible on the left, with 'Admin Language' selected.

ID	Page name	File name	Agent	Operator
49	Admin Language	cas_language.inc.php	☒	☒
89	Administrator Panel Permissions	cas_permissions.inc.php	☐	☐
72	Backup Database	cas_backup.inc.php	☒	☒
20	Casino Payout and Win Rate	cas_percent.inc.php	☒	☒
41	General Settings	cas_general.inc.php	☒	☒
38	Go Live	cas_live.inc.php	☒	☒
51	Add Content Page	cms_add.inc.php	☒	☒
58	Edit Content Page	cms_edit.inc.php	☒	☒

Admin language

Change the language of the administrator panel, to your desired language.

Administrator panel permissions

Decide the access level for your staff.

You can allow agents and operators to do anything, or restrict them from some features.

EG : You can allow agents to manage players, but restrict agents from managing **deposits** and **withdrawals**.

Everything becomes very simple with this feature. You can give certain privileges to operators to help you manage your casino business.

Backup database!

Create a manual database backup and save it to your PC and also on the server.

Casino Bank and WIN

Casino Bank221.47€
(How much money the casino has for payments)

1.*Randomness Play For Real Percent100%
(play for money winning chances percentage)

2.*Randomness Play For Fun Percent100%
(play for fun winning chances percentage)

**Payout Percent75%
***JACKPOT Increase Percent25.0000%

Player to player money transfer fee0.00%

Real Profit :15500.26(global profit)+526673.46(games profit) = 542173.72€

Update

*RANDOMNESS PERCENT - This feature will allow you to decide the chances of players to win.

**Payout % : influences the increase of Casino Bank .If Payout Percent is 75%, and user bets 400\$, then 25%(100\$) will go to Casino Profit and 75%(300\$) will go to casino bank and will be put at stake for the players to win.

***25.0000% from each bank revenue goes to jackpot - EXAMPLE : if bet=100 and payout=10% , and jackpot_percent=25% , then 90\$ go to profit , and 10\$ will go to payout. From the 10\$, 2.5\$ will go to jackpot and 7.5\$ to casino bank)

Global Casino Bank

Represents the amount of money that the CASINO puts at stake for the players to win back; this amount increases when the player places a bet and decreases when a player wins.

(EG: if **payout percent** is **80%** and player bets **100\$** , the bank will increase by **80\$**).

Please note that different add-ons can be bought, such as “Separate bank, megawin bank, freespins bank, bonus bank” for each game. The purpose of these add-ons is to allow the casino to have different payout banks for each game, so that the player is rewarded more often. You can read more [here](#), under the OPTIONAL FEATURES.

Randomness Play For Real Percent

Influences how often a player will win in **real** mode. Set this to 100% and the players will have random chances to win, depending on how the cards/symbols are positioned on the screen. The games will pay only if the bank has enough money to pay, otherwise the games will generate a combination of cards/symbols so that the player will lose.

Randomness Play For Fun Percent

Influences how often a player will win in **fun** mode.

Daily login bonus

Reward players for logging in to their account, and give them a bonus every day. The bonus can be collected only once per day. Set this to 0.00 to disable.

Registration bonus

New players that will register to your casino will receive a startup bonus, which is credited to their account right after they register. Set this to 0.00 to disable.

Payout Percent

Global Payout Percent, used for all games, including roulette, unless you have separate Payout Percent feature bought from us.

Influences the increase of Casino Bank and Casino Profit.

(EG: If Payout Percent is 75%, and user bets 400\$, then 75%(300\$) will go to **Casino Bank**, being put at stake for the players to win, and 25%(100\$) will go to **Casino Profit**).

JACKPOT Increase Percent

Represents how much % from the bank revenue goes to JACKPOT balance, if the current game has jackpot.

(EG: if set to 10% and player bets 100\$ on a slot game (only slots have jackpot), and payout percent is 80%, then the jackpot of that game will increase by $10\% * (80\% * 100\$) = 8\$$).

Player to player money transfer fee

Represents the percentage fee that will be applied to the player that will transfer money to his friend.

Example : User john111 wants to transfer 120\$ to his friend ado557. If the transfer fee is 0.5% then john111 will have to pay a fee of 0.5% out of 120\$(0.6\$).

Casino Profit

Represents the total profit that the casino made so far.

A percentage of each BET will go to profit. The percentage is equal to $(100 - \text{Payout Percent})$. So if your **Payout Percent** is 85% , and a player bets 100\$, then 15\$ will go to **Casino Profit**.

NOTE : The games have been designed for profit purpose. When a hand for a game is generated (using a true RNG), then the server calculates the potential win and makes sure that the casino has enough money in Casino Bank to pay the user. If there are not enough money to pay the user, then the server will generate a hand that will return a smaller win or even a loss. Player doesn't know this and has no way to find out, because all the calculations are made on server and are delivered to the client only after the calculations were finished.

Go Live!

This feature comes in hand, when you plan to start your online casino and Go Live!

Going live will delete, withdrawals, transfers, orders, users, staffs, gameplays records allowing you to start with fresh statistics! This will also set **games bank**, **casino bank** and **jackpot** to **0.00**! Please be careful!

General Settings

Welcome, admin (Master -) (click to change) | Main website | Profile | Log out

Casino General Settings

Template: Custom

Currency: EUR

Phone number: 0800-080-00

Use thousand separator when displaying money(EG: 1,000 or 1000): ☐

Enable Play For Fun: ☒

Enable Play For Real: ☒

Enable Skill Games: ☒

Global Mode: ☒
(if this is enabled , all games will share same bank and payout %)

Points Shop: ☐
(disable user withdraw option and allow users to buy products with their credit)

[Update](#)

Template – if you have purchased multiple templates, you can change the template at any time using this feature.

Currency – This represents the currency that the casino will be used. Can be switched at any time from **EURO, USD, GBP** and **POINTS**.

POINTS currency is recommended for casinos that are linked to other applications or that want to remain low-level (not become very popular) and not have a casino license.

Phone number – change the phone number that will be displayed in the contact area;

Daily login bonus – give your loyal players a daily bonus, each time they login to their account in an interval of 24 hours. Set this to 0 to disable it.

Registration bonus – give new players a bonus of credits, when they register a new account. Set this to 0 to disable it.

Use thousand separator – enable this feature to use comma as thousand separator for number.

(EG: with this feature enabled , numbers will look like this : 1,000,000,000.25; with this feature disabled, numbers will look like 1000000000.25)

Enable Play For Fun – If turned on(checked) the users will be able to play the games for fun, using virtual money currency . Virtual money currency doesn't count and is just for fun.

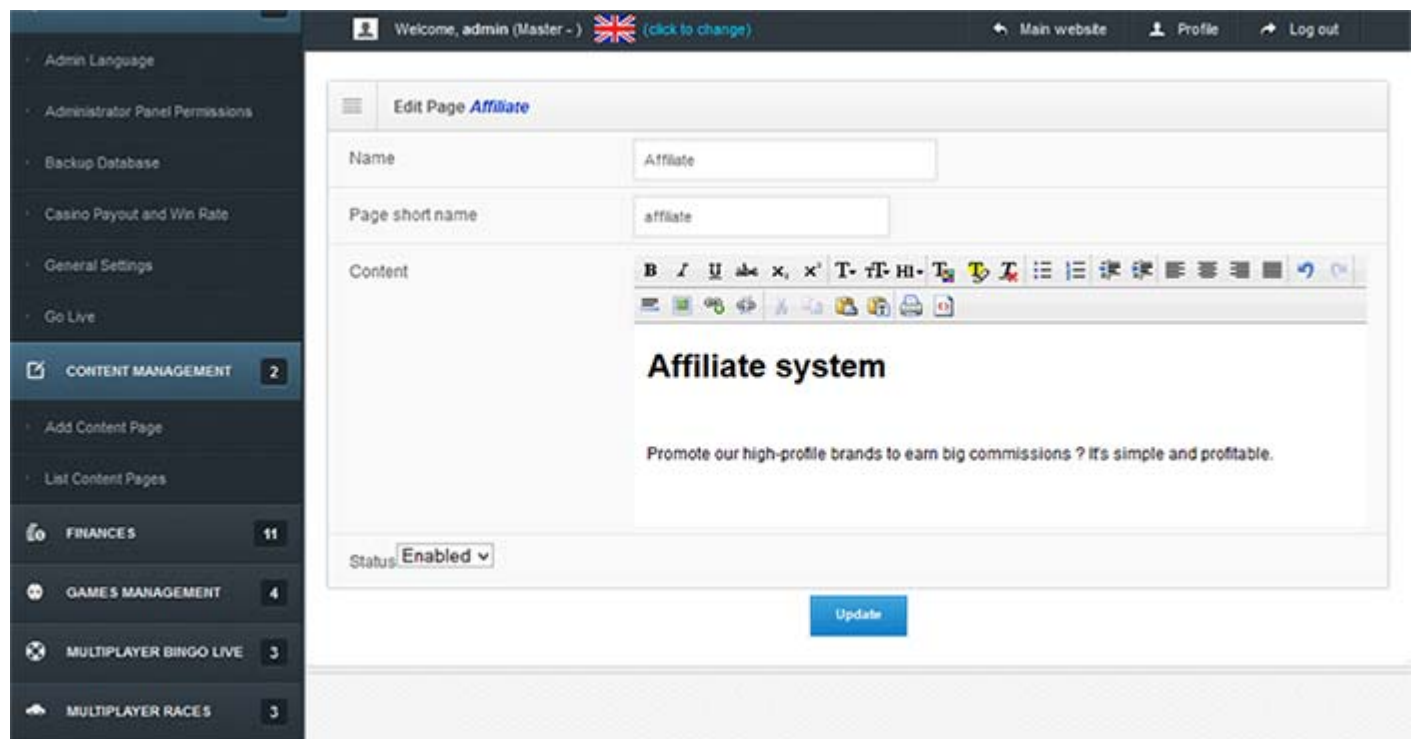

Enable Play For Real – If turned on(checked) the users will be able to play the games for real money.

Enable Skill Games– If you purchased any skill games from us, you can choose to enable/disable only the skill games from your website.

Global Mode– enable this to have all games share same bank and same win%. This can be disabled only if you purchased the individual bank feature. If you did not buy the “Individual bank feature”, please make sure this feature is always enabled.

VIP Points prizes – if this is enabled, then for every 10\$ that the player will bet, he will receive 1VPP

II.CONTENT MANAGEMENT

The screenshot displays the Admin Panel interface. On the left is a dark sidebar with a menu containing items like 'Admin Language', 'Administrator Panel Permissions', 'Backup Database', 'Casino Payout and Win Rate', 'General Settings', 'Go Live', 'CONTENT MANAGEMENT' (highlighted with a '2' badge), 'FINANCES' (with an '11' badge), 'GAMES MANAGEMENT' (with a '4' badge), 'MULTIPLAYER BINGO LIVE' (with a '3' badge), and 'MULTIPLAYER RACES' (with a '3' badge'). The main content area is titled 'Edit Page Affiliate'. It includes a top navigation bar with 'Welcome, admin (Master -)', a language selector (UK flag), and links for 'Main website', 'Profile', and 'Log out'. The form contains fields for 'Name' (set to 'Affiliate') and 'Page short name' (set to 'affiliate'). Below these is a rich text editor for 'Content' with a toolbar and the text 'Affiliate system' followed by 'Promote our high-profile brands to earn big commissions ? It's simple and profitable.' At the bottom, there is a 'Status' dropdown menu set to 'Enabled' and an 'Update' button.

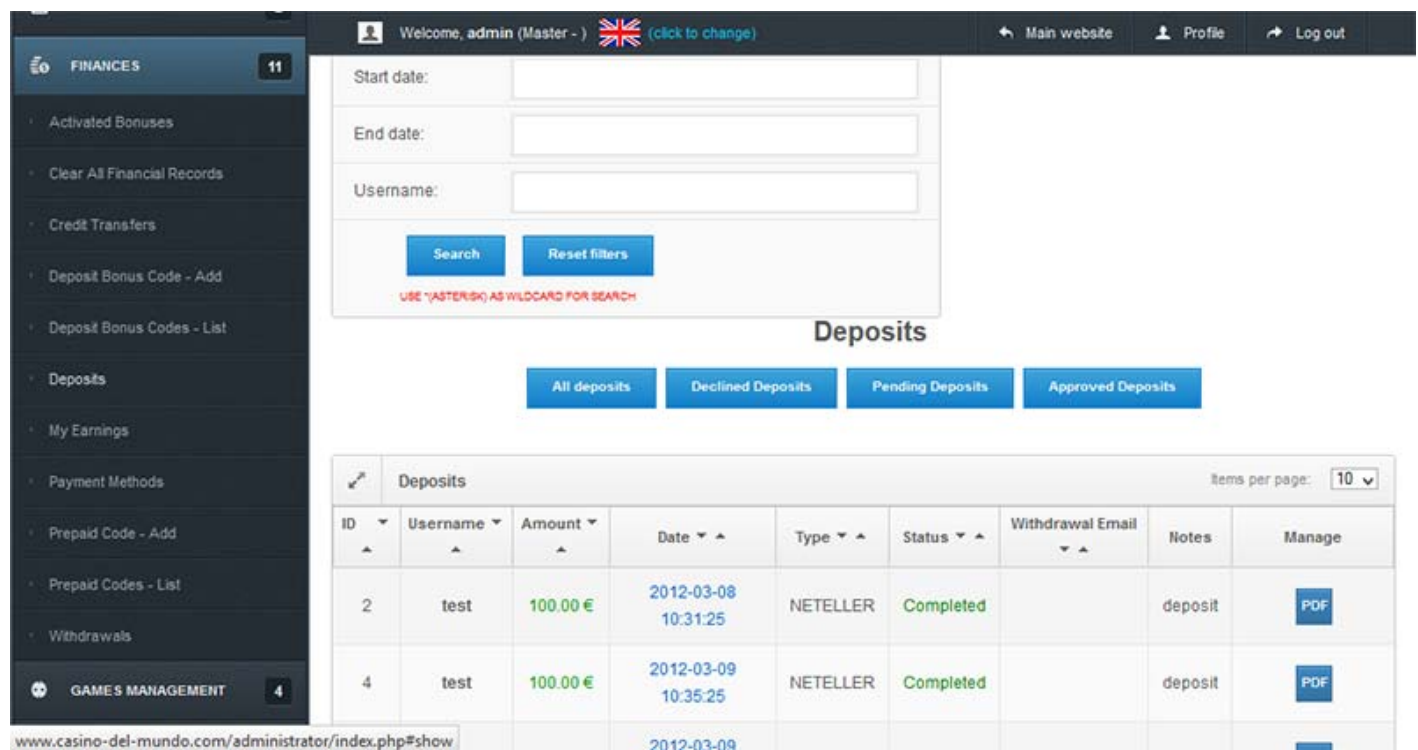

Add Content Page

Create a new page using our advanced content management system. It features a very useful WYSIWYG editor that lets you format the text the way you want. The “Page short name” value will be used to embed the link to this page on your website. Create a html anchor in your website , and add this tag to it : `onclick="showcontent('','shortcode');"` , and replace the ‘shortcode’ value from the above code with the value of your shortcode.

List Content Pages

Display a list with all the content pages you have created. You can edit or delete any of these pages.

III.FINANCES

The screenshot shows the 'FINANCES' section of a casino administrator interface. The left sidebar contains a list of financial management options: Activated Bonuses, Clear All Financial Records, Credit Transfers, Deposit Bonus Code - Add, Deposit Bonus Codes - List, Deposits, My Earnings, Payment Methods, Prepaid Code - Add, Prepaid Codes - List, and Withdrawals. The main area displays a 'Deposits' search form with fields for Start date, End date, and Username, along with Search and Reset filters buttons. Below the search form are four buttons: All deposits, Declined Deposits, Pending Deposits, and Approved Deposits. A table of deposits is shown below, with columns for ID, Username, Amount, Date, Type, Status, Withdrawal Email, Notes, and Manage. The table contains two rows of data, both showing a deposit of 100.00 € by a user named 'test' on 2012-03-08 and 2012-03-09, both completed.

ID	Username	Amount	Date	Type	Status	Withdrawal Email	Notes	Manage
2	test	100.00 €	2012-03-08 10:31:25	NETELLER	Completed		deposit	PDF
4	test	100.00 €	2012-03-09 10:35:25	NETELLER	Completed		deposit	PDF

Activated Bonuses

View all the activated deposit bonus codes.

Activate Instant Bonuses

View all the instant bonuses with rollover, that were given to players.

Clear All Financial Records

Clear all deposits, withdrawals and transfers.

Credit Transfers

Lists the following statistics:

- player to player transfers;
- staff to player transfers;
- player to staff transfers;
- staff to staff transfers;

Free Chips Add

In this page you can add credit to players, with rollover limit. When a rollover limit is set to a credit amount, the account cannot make any withdrawal requests until he clears his rollover limit.

The limit is calculated using the formula (DEPOSIT+BONUS)*ROLLOVER.

EG: If **user91** receives **100\$** in free chips with a rollover limit of **x20**, he can withdraw his money after he will wager a total amount of $100 * 20 = 2000\$$

Deposit Bonus Codes

In this page you can see all the available deposit bonus codes .You can delete,edit or create a new code.

These codes can be used only when user is making a deposit and it will influence the amount that his account will be credited with.

The Deposit Bonus Codes are of 2 types :

a) fixed (it means that no matter how much the user deposits, he will get the amount on the deposit bonus code.Example if bonus code is fixed and is **75\$**, and user deposits **100\$** he will get a bonus of **75\$**.He will get same bonus if he deposits **500\$**)

NOTE : BONUS AMOUNT MUST BE SMALLER THAN DEPOSITED AMOUNT IN ORDER TO BE REDEEMED

b)percent based (it means that the user will receive a % bonus , depending on the value of the bonus code. Example : if bonus code is percent based and is **50%** , and user deposits **750\$**,then he will receive a bonus of **375\$** .

deposit, and he will receive a DEPOSIT BONUS after. The bonus must be played several times to be unlocked.

Deposits

In this page you can see all the deposits made by the users of the casino.

When a user deposits money, his funds are auto-approved and his account is credited the second you receive the money (this is done by the IPN that is linked with your merchant account)

In order to make the deposits to await approval(not recommended), you must make changes to the files located in www.yourcasinoname.com/includes/ipn/);

Manual deposits, such as Bank Transfer deposits, that need approval, can be approved from this page. Upon approval, the amount deposited and the bonus are credited to the player account.

My Earnings

View all your earnings. The agent or operator can check his revenue using this page.

Payment Methods

In this page of the admin panel you can enable/disable any payment methods .You can towards which the payments will be made using a specific method.

NOTE : You will have to configure manually your payment merchant account so that the IPN(if using PayPal or CCBill) will point to the correct URL (check folder www.yourcasinoname.com/includes/ipn/ for the IPN file). Contact us for more details about this

Prepaid Coupon Codes

In this page you can see all the prepaid coupons. You can delete, edit or create a new coupon.

These coupons are codes that when entered, they will credit the account of the user instantly by the set amount. They can be used at any time, but only 1 time. The same coupon cannot be used by multiple users.

Withdrawals

In this page you can see all the withdrawals made by the users of the casino.

When a user asks for a withdrawal, a notification is sent to the casino owner. After that the casino owner must go to admin panel, approve/decline the withdrawal and send the money to the user if approved.

IV.GAMES MANAGEMENT

Clear All Gameplay records

Delete all gameplay records from all games, including roulette, car race and bingo.

Reset all jackpots

Set the jackpots of all games to be 0.00

Reset all Banks

Set the banks of all games and the global bank to be 0.00

Reset all Gameplays Records

This will delete all tickets, all bets and all gameplays data!

Doing this will cause you to lose all statistics related to games, including profit value and agent revenues!

Gameplays Data

View all the gameplay data , like bets, results, sum won, who placed bet, date , bet type (real or fun) and more. Please note that gameplays data for multiplayer games will not be listed here. The gameplays for multiplayer games are listed under the multiplayer games tab.

List All Games

All the games that you currently own will appear listed under this page.

It shows data like game name, game type, bet sizes and lets you EDIT/DISABLE/ DELETE any game.

Edit game

seconds)

Reel spin duration ms
How long each reel will spin (in milliseconds : 1000ms = 1 second)

Bet sizes

Autofullscreen ▾
If Enabled, when game starts show text "CLICK HERE TO START GAME". When user clicks the text, the game will go in fullscreen
If Disabled, no text will appear and player must manually enter fullscreen

Odds to give 5 scatters 1
EG : set this to 1000 to have 1 out of 1000 chances to give the player 5 scatters
3+ scatters give freespins in 5RS games
4+ scatters give freespins in 7RS games

Odds to give 4 scatters 1
EG : set this to 100 to have 1 out of 100 chances to give the player 4 scatters
3+ scatters give freespins in 5RS games
4+ scatters give freespins in 7RS games

Odds to give 3 scatters 1
EG : set this to 50 to have 1 out of 50 chances to give the player 3 scatters
3+ scatters give freespins in 5RS games
4+ scatters give freespins in 7RS games

After choosing a game to edit, you can change many factors that will influence the game's odds and functionality.

Min Bet – this represents the minimum total bet, allowed to play in the game, per 1 hand;

Max Bet – this represents the maximum total bet, allowed to play in the game, per 1 hand;

Max Win Allowed – this represents the maximum amount that the game will pay the player , per 1 hand played;

(EG: If this is set to 500, then the player cannot win more than 500CREDIT per hand, no matter what bet he placed)

Slot games extra functionality :

Win multiplier – If your total bet is 250CREDIT and WIN MULTIPLIER=100, then the player cannot win more than $250 \times 100 = 25000$. Set this to 0 and nobody will win at this game;

Bet sizes – adjust the bet sizes of each slot game. Must be comma separated values. EG : if you want your slot game to have the following bets : 1,5,10,25,100 , simply input that set of values in the box;

Animation speed – set how fast the reels will spin;

First reel stop – how long the game will wait until the first reel stops (in milliseconds ; 1000ms=1second);

Reel spin duration – how long each reel will spin (in milliseconds ; 1000ms = 1 second);

Jackpot – the total jackpot value available for the current game;

Autofullscreen - If Enabled, after the game finishes loading, a text with the following message will appear: "CLICK HERE TO START GAME". When user clicks the text, the game will enter fullscreen mode. If Disabled, no text will appear and player must manually enter fullscreen;

Odds to give 5 scatters

EG : set this to 1000 to have 1 out of 1000 chances to give the player 5 scatters

3+ scatters give freespins in 5RS games

4+ scatters give freespins in 7RS games

Odds to give 4 scatters

EG : set this to 100 to have 1 out of 100 chances to give the player 4 scatters

3+ scatters give freespins in 5RS games

4+ scatters give freespins in 7RS games

Odds to give 3 scatters

EG : set this to 50 to have 1 out of 50 chances to give the player 3 scatters

3+ scatters give freespins in 5RS games

4+ scatters give freespins in 7RS games

Odds to give 2 scatters

EG : set this to 30 to have 1 out of 30 chances to give the player 2 scatters

3+ scatters give freespins in 5RS games

4+ scatters give freespins in 7RS games

Odds to give 1 scatters

EG : set this to 10 to have 1 out of 10 chances to give the player 1 scatters

3+ scatters give freespins in 5RS games

4+ scatters give freespins in 7RS games

Odds of apparition for each symbol

Imagine a box containing balls with numbers from 2 to 12 . The probability to draw ball with number 6 is influenced by the odds of apparition of ball number 6. If in this box we have 20 balls, and 10 balls have number 6 written on them, then number6 will have a probability rate of being drawn, equal to 10/20.

With this feature you can adjust how often each symbol will appearx.

Each symbol must appear at least once and maximum 10 times!

SYMBOL 1 is SCATTER. 3RS slots dont have SCATTER.

SYMBOL 2 is WILD. 3RS slots dont have WILD.

SYMBOL 4 is BONUS. 3RS slots dont have BONUS.

SYMBOL 7 is JackPot Wheel BONUS. 3RS slots dont have JackPot Wheel BONUS.

EG: If you want SYMBOL4 to appear many times, it means that you must set value of S4 to be higher than all other values. Having the value of S4 set higher will also mean that the chances of giving BONUS will be higher.

Paylines also pay from RIGHT to LEFT – If enabled , the paylines will pay from left to right and from right to left

NOTE: our platform can be enriched with multiple add-ons. One of the add-ons we would like to mention is the “Individual/separate BANK, PAYOUT PERCENTAGE and WIN PERCENTAGE for each game”, available on our [CASINO SOFTWARE PAGE](#), under the OPTIONAL FEATURES area. With this add-on, each of your games will have its own PAYOUT PERCENTAGE, BANK and WIN PERCENTAGE. For each game you will be able to adjust these variables from the administrator panel.

V.PERSONS MANAGEMENT

Create Agent

Create an agent/subagent and earn revenue from his players or from the players of his subagents. Scroll to the bottom of this page to find out more about the OPERATOR/AGENT pyramid revenue system.

Create Operator

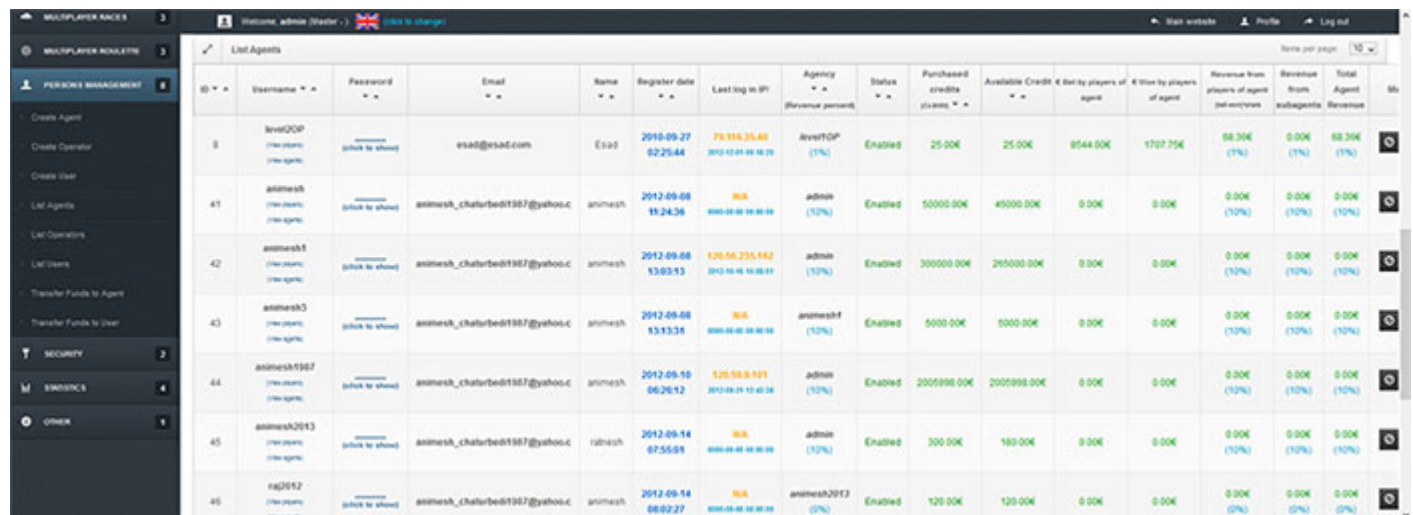

Create an operator and earn revenue from his players or from the players of his subagents. Scroll to the bottom of this page to find out more about the OPERATOR/AGENT pyramid revenue system.

VIII.OTHER

Newsletter

Send email to all your casino users, to inform them about certain events.

Admin/Operator/Agent/Subagent Pyramid Revenue System

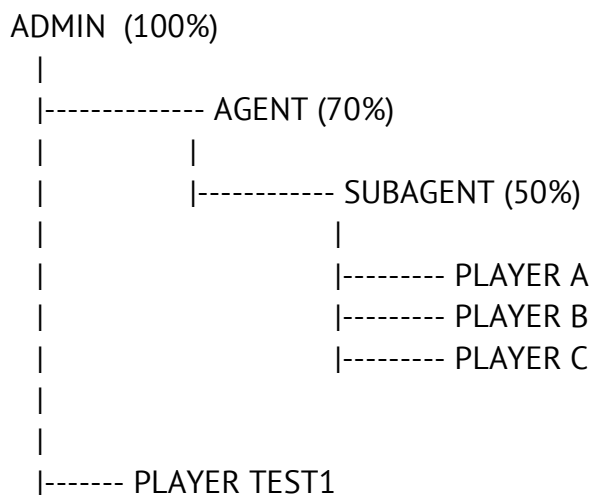

Operator(Agency)

- can create agents
- can edit/remove only his agents or subagents of agents/subagents
- can set share % for his agents or subagents of agents/subagents
- can create users
- can edit/remove only his users or players of agents/subagents
- can have thousands of agents or subagents and thousands of players
- you can enable/disable their permissions by using the **ADMINISTRATOR PANEL PERMISSIONS** page

Agent/Subagent

- can create agents
- can edit/remove only his subagents or subagents of subagents
- can set share % for his subagents or subagents of subagents
- can create users
- can edit/remove only his users or players of subagents
- can have thousands of subagents and thousands of players
- you can enable/disable their permissions by using the **ADMINISTRATOR PANEL PERMISSIONS** page;

Here is an example of how the share system works. Between () you will find share % value.

|----- PLAYER TEST2

|----- PLAYER TEST3

Assumed that players ABC betting and at the end they lose 1000.

Subagent will earn 500 ($1000 * 50\%$)

Agent will earn 200 ($1000 * (70-50)$)

Admin will earn 300 ($1000 * (100-70)$)

$$\frac{\text{TOT}}{1000} = 100\%$$
